Case Study no - 1

With net revenues of Rs 7.27 billion and net profit of Rs 304.6 million for the financial year ending December 31, 1999, Bata was India's largest manufacturer and marketer of footwear products. As on February 08, 2001, the company had a market valuation of Rs 3.7 billion. For years, Bata's reasonably priced, sturdy footwear had made it one of India's best known brands. Bata sold over 60 million pairs per annum in India and also exported its products in overseas markets including the US, the UK, Europe and Middle East countries. The company was an important operation for its Toronto, Canada based parent, the BSO group run by Thomas Bata, which owned 51% equity stake.

The company provided employment to over 15,000 people in its manufacturing and sales operations throughout India. Headquartered in Calcutta, the company manufactured over 33 million pairs per year in its five plants located in Batanagar (West Bengal), Faridabad (Haryana), Bangalore (Karnataka), Patna (Bihar) and Hosur (Tamil Nadu). The company had a distribution network of over 1,500 retail stores and 27 wholesale depots. It outsourced over 23 million pairs per year from various small-scale manufacturers.

Throughout its history, Bata was plagued by perennial labor problems with frequent strikes and lockouts at its manufacturing facilities. The company incurred huge employee expenses (22% of net sales in 1999). Competitors like Liberty Shoes were far more cost-effective with salaries of its 5,000 strong workforce comprising just 5% of its turnover.

When the company was in the red in 1995 for the first time, BSO restructured the entire board and sent in a team headed by Weston. Soon after he stepped in several changes were made in the management. Indians who held key positions in top management, were replaced with expatriate Weston taking over as managing director. Mike Middleton was appointed as deputy managing director and R. Senonner headed the marketing division. They made several key changes, including a complete overhaul of the company's operations and key departments. Within two months of Weston taking over, Bata decided to sell its headquarter building in Calcutta for Rs 195 million, in a bid to stem losses. The company shifted wholesale, planning & distribution, and the commercial department to Batanagar, despite opposition from the trade unions. Robin Majumdar, president, co-ordination committee, Bata Trade Union, criticized the move, saying: "Profits may return, but honor is difficult to regain."

The management team implemented a massive revamping exercise in which more than 250 managers and their juniors were asked to quit. Bata decided to stop further recruitment, and allowed only the redundant staff to fill the gaps created by superannuation and retirements. The management offered its staff an employment policy that was linked to sales-growth performance.

Case study no - 2

On November 24, 1998, America Online[1] (AOL) announced the acquisition of Netscape Communications (Netscape), a leading Internet browser company, for \$10 billion in an all-stock transaction. With this acquisition, AOL got control over Netscape's three different businesses – Netcenter portal, Netscape browser software and a B2B e-commerce software development division.

According to the terms of the deal, Netscape's shareholders received a 0.45 share of AOL's common stock for each share they owned. The stock markets reacted positively and AOL's sharevalue rose by 5% just after the announcement. Once shareholders and regulatory authorities approved the deal, Netscape's CEO James Barksdale (Barksdale)[2] was supposed to join AOL's board.

Many analysts felt that this acquisition would help AOL get an edge over Microsoft, the software market leader, in the Web browser market. Steve Case, (Case) Chairman and CEO of AOL, remarked, "By acquiring Netscape, we will be able to both broaden and deepen our relationships with business partners who need additional level of infrastructure support, and provide more value and convenience for the Internet consumers."

However, a certain section of analysts doubted whether AOL's management would accept Netscape's casual and independent culture. Moreover, they were worried that this deal may lead to a reduction in Netscape's workforce, the key strength of the company. A former Netscape employee commented, "People at Netscape were nervous about the implications of AOL buying us."

Allaying these fears, in an address to Netscape employees, Case said, "Maybe you joined the company because it was a cool company. We are not changing any of that. We want to run this as an independent culture." In spite of assurances by AOL CEO, it was reported that people at Netscape were asked to change the way they worked. In July 1999, Netscape employees were asked to leave if they did not like the new management.

By late 1999, most of the key employees, who had been associated with Netscape for many years, had left. Barksdale left to set up his own venture capital firm, taking along with him former CFO Peter Currie. Marc Andreessen (Andreessen) stayed with AOL as Chief Technology Officer till September 1999, when he left to start his own company, Loud cloud. Mike Homer, who ran the Netcenter portal, left the company while he was on a sabbatical.

Case Study no- 1

In digital advertising, it is imperative that communication be interactive and real time. Digital media is complex with social media and mobile app dominating it. Companies want a unique customized approach to communicate with their customers and hence an effective idea is key selection criterion. Advertisers use blogs and specialized websites, Smartphone apps and social media sites such as Facebook, Twitter and YouTube to interact with their customers.

Boutique are taking advantage of availability of inexpensive technologies and low entry barriers to dominate digital advertising space. It all started with BCWbwise, which was behind HUL's Sunilkgangofgirls.com- a networking site for hair care lovers. This happened before Facebook was born. Besides HUL, BCWbwise had clients like ITC Foods and Hero MotoCorp. DrizzleIn Media conducts social media research by studying consumer data available on the internet and develops targeted content. It has clients such as Lenovo, Airtel and Bajaj Allianz. Vserv mobi has developed AppWrapper, which helps create advertisements around apps. It latches full screen advertisements when user exits their apps. It has also built Audience Pro which links advertisers to telecom subscriber data which helps in customization. Its clients include Nokia and Google. Large advertising agencies have acquired some of these boutique agencies to shore up their competence in digital advertising. Dentsu, JWT and IPG Mediabrands have acquired WebChutney, Hungama Digital and Interactive Avenues respectively.

Q.1.1) Analyze the above case.

Q.1.2) How is advertising in digital medium different from that in the traditional medium?

Q.1.3) How can advertising in digital medium evolve in the future.

Case no – 2

In March 2014, a food inspector at the Uttar Pradesh government's Food Safety and Drug Administration spotted the label of packets of Maggi noodles that claimed "no added MSG (monosodium glutamate)" during one of his routine raids on retail outlets. The sample was picked up and sent to the state laboratory at Gorakhpur for testing. The result that came back a few weeks later for positive that particular sample of Maggi noodles contained MSG. Samples of Maggi noodles were then sent to the Central Food Laboratory in Kolkata in June 2014. Maggi ban in 2015, NIL had revamped its marketing strategy to regain customer trust and increase sales. It had been creating a buzz for Maggi on social media stating how consumers had been missing their own favourite 'two-minute' noodles...

Since then following its re-entry, Maggi's market share steadily grew in India. From 55% in June 2016, it rose to 60% by the end of 2016. The company reported a turnover of US\$ 1.4 billion in

2016, up 13% over 2015. However, cost pressures and increased marketing spending led to subdued growth in profits, said experts.

Though Maggi had recovered a lot of ground with a 60% market share as of August 2017, it was still down from the 77% before the ban. The instant noodle market, which had been rocked by a ban on market leader Maggi, had seen the entry of new players and the expansion in the market share of others since then
